TW MEDIA CART & MEDIA ENCODERS

Turn Key Solutions
Engaging Technology
Proven Platform
Universal Formats
Very Portable

TOTAL WEBCASTING introduces the TW Media Cart and Media Encoders for the production of high quality live Webcasts. Through 'Innovative Integration' the TW Media Cart and Media Encoders bring together all of the functionality needed for any live event.

WHY WEBCAST?

Webcasting live events expands your reach, and engages an audience that would otherwise be left out. Through the use of Webcasting, organizations can connect their constituents through the distribution of their content.

TW MEDIA CART combines all of the functionality needed to do a live webcast. Every Media Cart includes:

- 6 Camera Joystick Controller and Switcher
- Triple View LCD Monitors
- 8 Channel Audio Mixer with 2 Boundary Microphones
- 2 SONY Pan, Tilt, Zoom Remote Control Cameras
- Video and Control over twisted pair multiplexors
- Customized Portable Cart

TW MEDIA ENCODER is the right solution for organizations that only need media conversion. By simply connecting your video and audio feeds, the TW Media Encoder will convert and stream your content to our system for easy distribution.

TW CDN completes the system by connecting your content stream to a world class Content Distribution Network. Along with Total Webcasting's administration, this combination of hardware and services assures a very high quality experience.

TWENTY FOUR (24) HOUR SUPPORT
